

B. Pashmak and Flowers

time limit per test: 1 second

memory limit per test: 256 megabytes

input: standard input

output: standard output

Pashmak decided to give Parmida a pair of flowers from the garden. There are n flowers in the garden and the i -th of them has a beauty number b_i . Parmida is a very strange girl so she doesn't want to have the two most beautiful flowers necessarily. She wants to have those pairs of flowers that their beauty difference is maximal possible!

Your task is to write a program which calculates two things:

1. The maximum beauty difference of flowers that Pashmak can give to Parmida.
2. The number of ways that Pashmak can pick the flowers. Two ways are considered different if and only if there is at least one flower that is chosen in the first way and not chosen in the second way.

Input

The first line of the input contains n ($2 \leq n \leq 2 \cdot 10^5$). In the next line there are n space-separated integers b_1, b_2, \dots, b_n ($1 \leq b_i \leq 10^9$).

Output

The only line of output should contain two integers. The maximum beauty difference and the number of ways this may happen, respectively.

Examples

input
2 1 2
output
1 1
input
3 1 4 5
output
4 1
input
5 3 1 2 3 1
output
2 4

Note

In the third sample the maximum beauty difference is 2 and there are 4 ways to do this:

1. choosing the first and the second flowers;
2. choosing the first and the fifth flowers;
3. choosing the fourth and the second flowers;
4. choosing the fourth and the fifth flowers.

Codeforces Round #261 (Div. 2)

Finished

→ Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
