

## A. Tavas and Nafas

time limit per test: 1 second

memory limit per test: 256 megabytes

input: standard input

output: standard output

Today Tavas got his test result as an integer score and he wants to share it with his girlfriend, Nafas.

His phone operating system is Tavdroid, and its keyboard doesn't have any digits! He wants to share his score with Nafas via text, so he has no choice but to send this number using words.

He ate coffee mix without water again, so right now he's really messed up and can't think.

Your task is to help him by telling him what to type.

### Input

The first and only line of input contains an integer  $s$  ( $0 \leq s \leq 99$ ), Tavas's score.

### Output

In the first and only line of output, print a single string consisting only from English lowercase letters and hyphens ('-'). Do not use spaces.

### Examples

<b>input</b>
6
<b>output</b>
six
<b>input</b>
99
<b>output</b>
ninety-nine
<b>input</b>
20
<b>output</b>
twenty

### Note

You can find all you need to know about English numerals in [http://en.wikipedia.org/wiki/English\\_numerals](http://en.wikipedia.org/wiki/English_numerals).

### Codeforces Round #299 (Div. 2)

Finished

### → Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
