

## B. Wet Shark and Bishops

time limit per test: 2 seconds

memory limit per test: 256 megabytes

input: standard input

output: standard output

Today, Wet Shark is given  $n$  bishops on a  $1000$  by  $1000$  grid. Both rows and columns of the grid are numbered from  $1$  to  $1000$ . Rows are numbered from top to bottom, while columns are numbered from left to right.

Wet Shark thinks that two bishops attack each other if they share the same diagonal. Note, that this is the only criteria, so two bishops may attack each other (according to Wet Shark) even if there is another bishop located between them. Now Wet Shark wants to count the number of pairs of bishops that attack each other.

### Input

The first line of the input contains  $n$  ( $1 \leq n \leq 200\,000$ ) — the number of bishops.

Each of next  $n$  lines contains two space separated integers  $x_i$  and  $y_i$  ( $1 \leq x_i, y_i \leq 1000$ ) — the number of row and the number of column where  $i$ -th bishop is positioned. It's guaranteed that no two bishops share the same position.

### Output

Output one integer — the number of pairs of bishops which attack each other.

### Examples

input
<pre> 5 1 1 1 5 3 3 5 1 5 5 </pre>
output
<pre> 6 </pre>
input
<pre> 3 1 1 2 3 3 5 </pre>
output
<pre> 0 </pre>

### Note

In the first sample following pairs of bishops attack each other:  $(1, 3)$ ,  $(1, 5)$ ,  $(2, 3)$ ,  $(2, 4)$ ,  $(3, 4)$  and  $(3, 5)$ . Pairs  $(1, 2)$ ,  $(1, 4)$ ,  $(2, 5)$  and  $(4, 5)$  do not attack each other because they do not share the same diagonal.

### Codeforces Round #341 (Div. 2)

Finished

### → Virtual participation

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.
